

Hall 7 - Stand T29 U30

Dear Ladies and Gentlemen

Our brand-new product will be awarded with the SMART Label at HOST Milano.
Here is your invitation to join us at the exhibition and experience the innovative prototype.
Here are the highlights of Gastros Switzerland's stand.

We are looking forward to your visit!

Gastros constantly increases its leadership in the market of **undercounter technology**. A big plus of our unique InductWarm® 130+ Modul is that it is invisibly installed under the counter's surface. At HOST you will be able to have a look right through the buffet counter on the hidden technology. Well, it's not magic. We simply made the counter transparent, but we promise that there will be a little surprise...

In Milan, we take the chance to support the FCSI actively. First of all, you will find our InductPlate® warming counter at the FCSI exhibition area. Here you can **enjoy a warm snack**.

The second is that Gastros CEO Peter Cairoli is a guest speaker of one of the FCSI seminars. He will give you interesting insights in the topic "Save Energy and Cost by using High End Induction Systems".

Sunday, 20th October 2.15 till 3 pm

Besides the proven inductive undercounter, built-in and table-top solutions we will present you our brand-new battery-powered induction unit for the very first time. The **InductWarm® Battery Module (IWBM)** is an OEM product that can be installed into all kinds of mobile buffet systems and keeps food warm for up to 4 hours. The concept is already gaining lots of attention. At HOST, the induction unit will receive the SMART Label - an **award for special innovations** of the hospitality industry.

Come and experience the InductWarm® Battery Module at the Gastros stand. We will be happy to answer your questions.

As there was such a big interest in our induction testers at Internorga we decided to bring them to HOST Milano as well. And of course, they will be for free again! One induction tester per visitor at the Gastros exhibition stand and only while stocks last.
