

# Undercounter induction unit for buffets

## InductWarm® 130+

Article number 1 13 200 04

Induction unit for keeping food warm constructed for invisible installation below surfaces made from various materials like artificial stone, glass, or wood.

### Advantages:

- ✓ A maximum of flexibility in designing individual, modern buffet furniture
- ✓ Cover material can be used as a continuous surface without cut-outs
- ✓ Even surface that can be easily cleaned and disinfected
- ✓ Highly energy-efficient due to modern induction technology
- ✓ Precise power regulation at the touch of a button
- ✓ Instantly ready to use without long preheating period
- ✓ Improved room climate: no hot steam, no smell of burning paste
- ✓ Can be used with all kinds of induction-compatible dishes up to size GN 1/1

### Features:

4 power levels	temperature range 40°C - 95°C
Direct control on device or	external control panel or infrared remote control (optional)
Dynamic Power Control	adjusts power output to the induction capability of the dishes
InductWarm® Bus	up to 16 units in a network can be controlled with one panel
Dish detection	power output only when dishes are placed on top
Coil temperature control	Protects induction coil from overheating
Pot teaching	
USB port	for software updates and read-out

## Technical Data

Dimensions:	350x350x110 mm
Weight:	6.5 kg
Coil size:	310 mm (squared)
Max. power:	800 W
Input voltage range:	110/240 V AC, 50/60 Hz
Internal electrical fuse protection:	10 A
Connection:	C13

## Accessories overview (optional)

Power cord 1500 mm, country specific connector, 10A

InductWarm® external control panel

InductWarm® infrared remote control (incl. battery)

Connecting cable to the external control panel

InductWarm® BUS cable, 2000 mm

InductWarm® power chain cable 130+, 480 mm  
 220V/110V – connecting cable for up to max. 4 induction units

InductWarm® mounting kit
